DETAILED ACTION

Status of the Claims

Claims 1-20 are currently pending.

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to lantibiotic display peptides, classified in class 530, subclass 350.
 - II. Claims 10-19, drawn to recombinant method of making a lantibody display peptide and screening (e.g. immunological) thereof, classified in class 435, subclass 7.1 and 69.1.
 - III. Claim 20, drawn to a kit, classified in class 436, subclass 808.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case that the product as claimed can be made by another and materially different process e.g. solid/liquid phase peptide syntheses.

Art Unit: 1639

3. Inventions III and II (in part) are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the patentable feature of the combination may reside in the nature of the anti-lantibody antibody and/or means for immunoadsorption which is not present in the host cell . The subcombination has separate utility such as making a protein or gene expression detection and/or modulation which is distinctly different from the identification of a target molecule. .
4. Because these inventions are distinct for the reasons given above and
 - a. have acquired a separate status in the art as shown by their different classification; and/or
 - b. difference in manual/computer classification, structure, name and bibliographic searches; and/or
 - c. inventions have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
